Installation/Care/Use Manual

SwirlFlo® Refrigerated Fountain with FLEXI-GUARD®

Installer

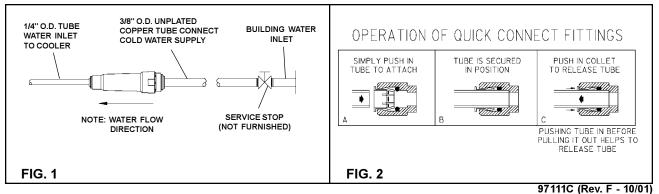

To assure you install this model easily and correctly, PLEASE READ THESE SIMPLE INSTRUCTIONS BEFORE STARTING THE INSTALLATION. CHECK YOUR INSTALLATION FOR COMPLIANCE WITH PLUMBING, ELECTRICAL AND OTHER APPLICABLE CODES. After installation, leave these instructions inside the fountain for future reference.

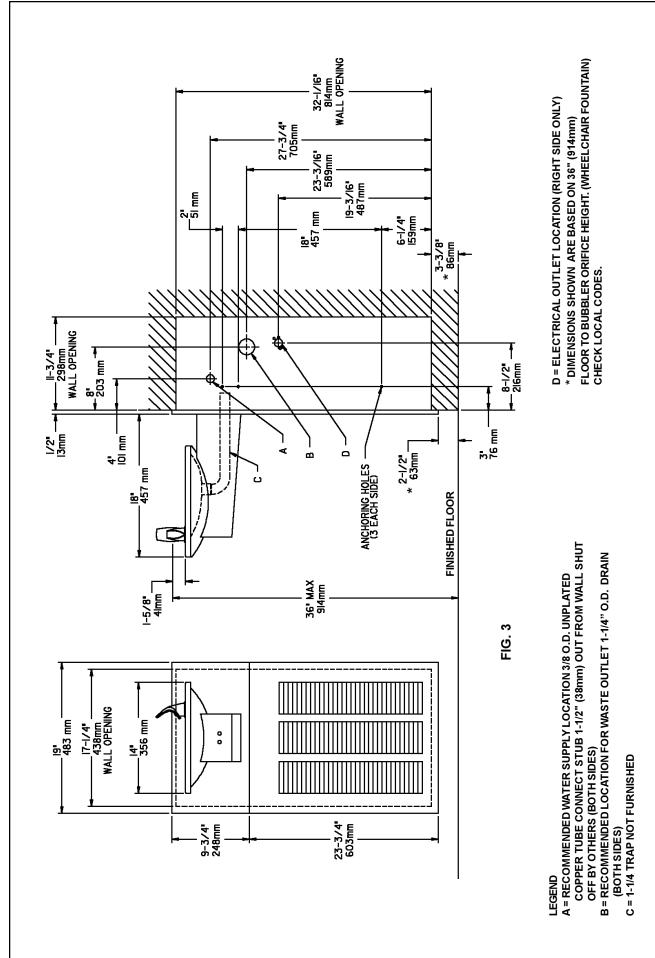

IMPORTANT

ALL SERVICE TO BE PERFORMED BY AN AUTHORIZED SERVICE PERSON

IMPORTANT! INSTALLER PLEASE NOTE.

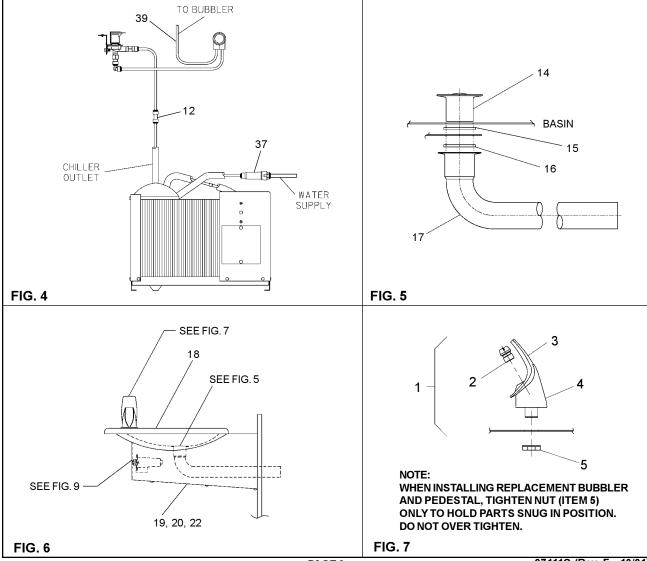

THE GROUNDING OF ELECTRICAL EQUIPMENT SUCH AS TELEPHONE, COMPUTERS, ETC. TO WATER LINES IS A COMMON PROCEDURE. THIS GROUNDING MAY BE IN THE BUILDING OR MAY OCCUR AWAY FROM THE BUILDING. THIS GROUNDING CAN CAUSE ELECTRICAL FEEDBACK INTO A FOUNTAIN, CREATING AN ELECTROLYSIS WHICH CAUSES A METALLIC TASTE OR AN INCREASE IN THE METAL CONTENT OF THE WATER. THIS CONDITION IS AVOIDABLE BY USING THE PROPER MATERIALS AS INDICATED. ANY DRAIN FITTINGS PROVIDED BY THE INSTALLER SHOULD BE MADE OF PLASTIC TO ELECTRICALLY ISOLATE THE FOUNTAIN FROM THE BUILDING PLUMBING SYSTEM.

INSTALLATION INSTRUCTIONS

- 1. Fasten mounting box into wall cutout using (6) screws or bolts (provided by others) through holes or knockouts provided on each side of the mounting box. See mounting box instructions and figure 3.
- 2. Mount back panel using (2) #8 x .50" (13mm) pan head screws and (2) large clips provided.
- 3. Secure fountain body through back panel to wall box using (4) 5/16" -18 x 1.75" (44mm) hex head bolts and (4) 5/16" 18 nuts provided. (Typical each fountain).
- 4. Attach solenoid valve assembly to the mounting box. See figure 8.
- **5.** Place refrigeration package inside mounting box and connect water outlet tube on refrigeration package to water in tube on regulator holder (Item 7) with tubing and fitting provided. See figure 4.
- 6. Water inlet is 3/8" O.D. and waste tube is 1-1/4" O.D. (Both provided) 1-1/4" O.D. slip trap (provided by others).
- 7. Connecting lines to be unplated copper and thoroughly flushed to remove all foreign matter before connecting to refrigeration package. The furnished strainer (Item 39) should be added to the supply line.
- 8. Connect refrigeration package to supply line with a shut off valve and install a 3/8" unplated copper water line between the valve and the cooler. Remove burrs from outside of water line. Insert water line straight into fittings until they reach a positive stop, approximately 3/4" (19mm). (See Fig. 1 and 2) DO NOT SOLDER TUBES INSERTED INTO THE STRAINER AS DAMAGE TO THE O-RINGS MAY RESULT.
- 9. Electrical: Insure power supply is identical in voltage, hertz, and phase to that specified on the refrigeration package serial plate. Never wire compressor directly to the power supply.
- 10. Turn water supply on and check thoroughly for leaks.
- 11. Release air from tank by activating the sensor; a steady stream of water assures all air is removed.
- 12. Re-check for leaks.
- 13. Stream height is factory set at 35 PSI. If supply pressure varies greatly from this, turn adjustment screw on regulator (Item 9). Clockwise adjustment will raise the stream height and counter-clockwise adjustment will lower stream height. For best adjustment, stream should hit basin approximately 6-1/2" from the bubbler.
- 14. Rotate fan blade on refrigeration package to insure proper clearance and free fan action.
- 15. Connect power supply.
- 16. Replace access panel and install grill using (2) #8 x 1.00" (25mm) PH screws and (2) small clips provided.

ENO8C*B

PARTS LIST		
ITEM NO.	PARTNO.	DESCRIPTION
1	51349C	BUBBLER ASSY
2	40322C	ORIFICE ASSY
3	50934C	HOUSING ASSY
4	50168C	PEDESTAL
5	75580C	BUBBLER LOCKNUT
6	70426C	SCREW - #8-32 X .25 THMS
7	50986C	HOLDER - REGULATOR
8	40045C	HEX NUT
9	61313C	REGULATOR
11	70208C	SCREW #10-24 X .37 PHTC
12	70683C	UNION - 1/4
13	55000942	BACK PANEL ASSY
14	45336C	STRAINER & FERRULE ASSY
15	50074C	GASKET-TAILPIPE
16	50377C	GASKET-TAILPIPE
17	45330C	WASTE ARM
18	55001026	BASIN SWIRLFLOW
19	22535C	FTN BODY & SHELL-LONG
20	21846C	COVER PLATE-LONG
21	EG23	GRILL
22	70055C	SPEED NUT
23	74070032	SPEED NUT#8
24	74130045	CLIP - TINNERMAN
25	22525C	REGULATOR MOUNTING BRACKET
26	22526C	SOLENOID MOUNTING BRACKET
27	31272C	SOLENOID VALVE ASSY
28	31376C	POWER CORD
29	31384C	SENSOR ASSY
30	70016C	HEX NUT #10-32
31	38417001	SCREW - #8-18 X .37 HHSM
32	56082C	NUT - REGULATOR
33	50203C	STRAIN RELIEF
34	51409C	SPACER - 1/2 X .44
35	70256C	SCREW - 1/4-20 X .38 HHTC
36	75507C	FITTING - 1/4 NPTF X 1/4 O.D.
37	55996C	STRAINER
38	70817C	ELBOW - 1/4 X 1/4
39	56092C	POLY TUBING (CUT TO LENGTH)

TROUBLE SHOOTING AND MAINTENANCE

- Orifice Assy: Minerals deposits on orifice can cause water flow to spurt or not regulate. Mineral deposits may be removed from the orifice with a small round file not over 1/8" diameter or a small diameter wire. CAUTION: Do not file or cut orifice materials.
- Stream Regulator: If orifice is free of material deposits regulate water flow according to instructions on page 3.
- 3. Sensor Control: The sensor has a 2 second delay time. If sensor fails to operate valve mechanism or operates erratically, check the following:
 - a) Ensure there are no obstructions within a 40 inch radius from the front of fountain.
 - b) Check wire connections at the solenoid valve and at the sensor.
 CAUTION: Make sure unit is unplugged before checking any wiring.
 - c) Ensure proper operation of solenoid valve. If there is an audible clicking sound yet no water flows, look for an obstruction in the valve itself or elsewhere in the water supply line.

WARNING: Do not expose sensor to direct sunlight.

- 4. Sensor Range Adjustment: The electronic sensor used in this fountain is factory pre-set for a "visual" range of 36 inches. If actual range varies greatly from this, or a different setting is desired, follow the range adjustment procedure below:
 - a) Remove bottom cover of fountain.
 - b) Remove sensor by removing washers and nuts that secure sensor on studs.
 - c) Locate range adjustment screw between the red lenses of the sensor, then with a small tip screwdriver, rotate the range adjusting screw clockwise to increase range or counter-clockwise to decrease range. 1/4 turn of screw is equal to approximately 12 - 18 inches of range.

CAUTION: Complete range of sensor (24 - 48 inches) is only one turn of the adjusting screw.

d) Remount sensor on studs and replace bottom cover.
